Greater Springfield—The families and communities we serve are always our top priority. Safety is a top priority and we will modify our operations per guidance as guidelines are extended or updated from CDC and Illinois IDPH.

We continue to monitor and follow all guidelines from the CDC, Illinois and Sangamon County Department of Public Health, as well as all local and state emergency services. Current guidance states that physical distancing and face coverings are required. The City of Springfield has issued guidance stating that individuals who are over two years old and medically able will be required to wear a face-covering or a mask when in public indoor spaces like stores, or any other public place where they can’t maintain a six-foot social distance. Gathering and ceremony attendance limits are an evolving number and we will provide appropriate guidance as we assist families with planning.

We will be assisting local families with ceremonial options to meet their needs while honoring the updated safety guidelines.

The CDC continues to recommend that “those with underlying health conditions should be especially careful to avoid exposure to risk areas.” We also request that guests experiencing cold or flu-like symptoms of fever, cough, and shortness of breath, please refrain from visiting the funeral home currently as is advisable for any public place.

We have set in place measures to help protect and accommodate guests at our facilities. We will accommodate families in planning arrangements and conducting ceremonies in the manner needed to ensure their safety and comfort while also ensuring the safety of our associates while honoring their loved one.

We have online register books available and the option to call our offices for us to add your name to the register books. We have placed safety information from the CDC throughout our facilities on how to stop the spread of germs and other safety signage. We continue, as always, to provide professional hand sanitizer stations throughout our facilities and have enacted extra cleaning measures both morning and night, in of all our public areas.

Our family and associates are here to serve, protect and honor each family as we have been for more than 127 years. If you have any questions or concerns, please call any of our locations.

Chris Butler—President, Butler Family of Organizations

*CDC Information - The CDC states that decedents with COVID-19 may be buried or cremated according to the family’s preferences. They state that there is currently no known risk associated with being in the same room at a funeral home with the body of someone who has died of COVID-19. However, the CDC states that people may consider not touching the body of someone who has died of COVID-19.

For more information please contact Butler Funeral Homes at 217-544-4646.
